

Unusual Rigging & Engineering LLC opened for business in 2009, bringing to Dubai a wealth of experience and expertise unmatched anywhere else in the world. Backed by the UK's Unusual Rigging Ltd, which celebrates its 30th anniversary in 2013, Unusual Rigging & Engineering offers its clients unique solutions to the challenges of suspending, elevating or moving equipment, scenery or people. The installation may be permanent, where there is a requirement to provide long-term infrastructure, or temporary.

Over the years our teams have worked on many high profile projects, including state occasions in the United Kingdom, Jordan, Saudi Arabia and for the governments of Abu Dhabi, Dubai and Oman. However, those of 2012 were probably the most memorable projects of all, including as they did the London 2012 Games. Unusual Rigging was on site at 21 Olympic venues; that is the level of expertise we bring to Dubai.

Unique qualities

Quality people: We strive to provide our clients with excellence, whatever the project, whatever the brief. And that quality begins with our own staff: we encourage all staff to continually improve their skills set and increase their technical knowledge. We employ the highest calibre staff in the region. Our project managers and riggers are the highest qualified in the UAE and our office-based personnel include an engineer and AutoCAD draughtsperson. When required, we can also draw on the experience of our specialist teams in the UK, where we have a six strong CAD team, including fully qualified structural and mechanical engineers.

The Dubai company is run by managing partner Alan Thomson, whose experience includes the UK's VE and VJ celebrations, the Golden Jubilee Celebrations for Her Majesty Queen Elizabeth II, services to the Royal families of not just the United Kingdom but also Jordan, Saudi Arabia and the governments of Abu Dhabi, Dubai and Oman. His theatre clients have included Sir Andrew Lloyd Weber and Cameron Macintosh, while among industrial clients he numbers Imagination, British Airways, Philips, BMW and Mercedes.

Quality products: All our projects, from theatre rigging to suspending people or large inanimate objects, involve risk during both the build-up and the life of the event. We reduce that risk to a minimum by specifying only the best equipment available, such as that from the Prolyte Group, for whom we are the regional sales and service partner, and Liftket chain hoists, which benefit from options in speed and add on extras such as double brakes and multiple limits.

Unique skills

The many high profile projects that Unusual Rigging & Engineering staff have been involved with over the years gives us a blend of skills – and an unswerving ability to meet deadlines – that is probably unique in the industry. That's what makes us Unusual.

Services

Our core business is rigging services, including the design, build and engineering for all types of temporary and permanent installations, which are constructed to meet the highest international safety standards. We specialise in automation and motion control and have extensive experience in the design, fabrication and installation of flying systems, grid systems and stage lifts.

We also now provide an inspection, maintenance, repair and certification service for entertainment hoists as well as testing and servicing equipment manufactured by Doughty and Prolyte, for whom we are regional distributors.

And equipment too . . .

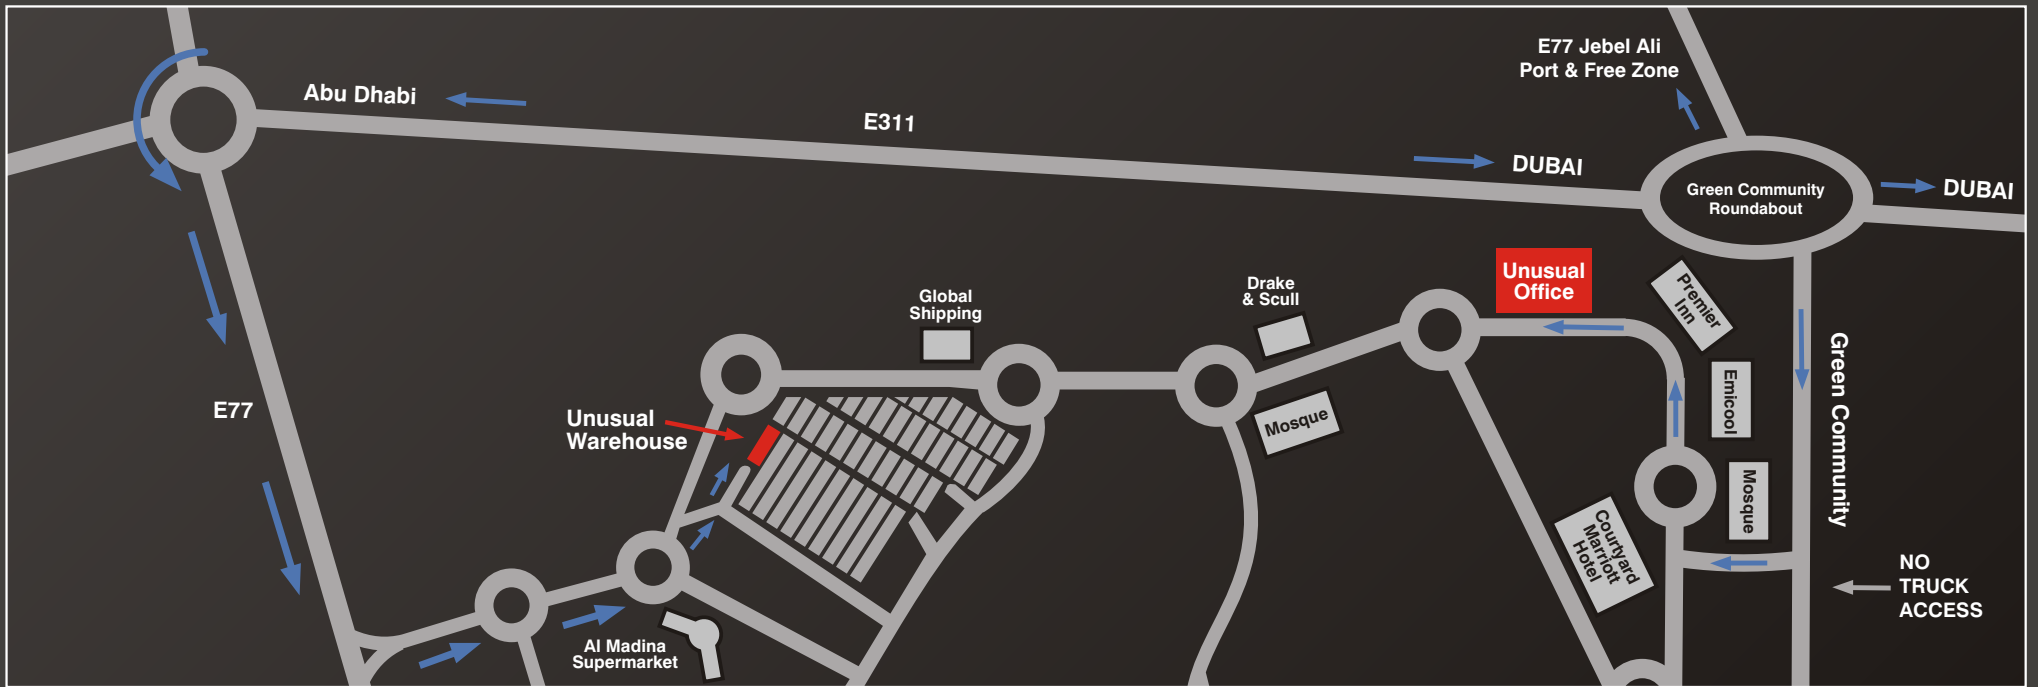

We recently added product sales to our offering: in addition to major items such as truss and chain hoists we also offer chain and steel wire rope slings, distro/motor control, fibre and wire rope, hoists and winches, manual lifting equipment, safety and access equipment, truss, webbing products and many other rigging related items. All products are shown on our website – contact us for more information and prices.

Projects and clients

Among our projects and clients we number:

- Delta Sound
- Dubai Airshow
- Creative Technology
- Mission Impossible – Ghost Protocol
- Mall of the Emirates
- Laureus World Sports Awards
- Thinkwell Group
- Dubai Mall
- Kuwait Centre for Autism
- Samsung
- MCI Group
- Deira City Centre
